

BIG TALKS for Little people

LESSON 1 - PRE-SURVEY & INTRODUCTION

LESSON AIMS

Participate in classroom activities to develop group work rules and skills.

Optional: Students will be asked to complete the pre-survey.

Important note: Before beginning the surveys – please refer to the ‘Background information for Teachers’ found on the Big Talks website, regarding the specific criteria and guidelines for being involved in the surveys and data collection.

If your school or college is not involved in the survey process, please start Lesson 1 at “Part 2: Introduce students to the Idea of the program and the Peeps.”

EQUIPMENT REQUIRED

Optional: Devices for the students to complete an online pre-survey. It’s a good idea to test this pre-survey on devices before you start the class. Make sure you can find a device which loads the pre-survey properly.

Digital animation: “Introduction animation”.

General Stationery: For drawing and writing.

Bean Bags: For groupwork activity

CORE CONTENT

PART 1 (OPTIONAL):

Students will be asked to complete the pre-survey.

PART 2: Introduce students to the idea of the Big Talks program, and the peeps.

PART 3: Group work. Establishing groups and rules.

PART 4: Watch the animation, and work in groups.

PART 5: Bean bag toss.

PART 6: Drawing activity.

PART 7: Face gallery activity.

TEACHER NOTES

Before beginning Lesson 1 of the ‘Big Talks...’ HPE program, school leadership staff will be asked if they would like to participate in the optional Educator and student surveys and interviews.

If participating in the optional surveys, students will be asked to complete the surveys in the first and last week of the program. They may also be given the opportunity to participate in a small student ‘Focus Group’ to discuss their experiences with the program. At the end of the program, teachers will also be given the opportunity to participate in an optional survey and one-on-one interview which will ask about aspects of their delivery of the program.

These surveys will help researchers and program developers assess the success of the ‘Big Talks...’ program in achieving its set aims of improving student wellbeing.

*Please note – Signed permissions from Principals, Educators, Caregivers and Students must be sought to collect any form of data via surveys, ‘Focus Group’ and/or interviews.

The animations also uniquely feature visible feelings above the Peeps called ‘Feels’, to show that feelings can sometimes be very different from an individual’s outward appearance or manner e.g. A student may appear uninterested in other students, when in fact they may be very shy or be having a troubling personal issue. Learning this concept can help to foster positive and more meaningful inter-student relationships and increase an awareness of other people’s needs.

The HPE lesson plans have been developed to enable teachers to achieve with students the ‘relevant to mental health’ education aspects of the Student Achievement Standards at Years 2, 4 and 6 of the Australian (V9) and State Curriculum Health and Physical Education frameworks.

Please read the recommended Teacher Sheet: ‘Curriculum Mapping’, located on the ‘Big Talks...’ website.

Please read the recommended Teacher Sheet: ‘Teacher Wellbeing’, located on the ‘Big Talks...’ website.

LESSON 1 - PRE-SURVEY & INTRODUCTION

PART 1 (OPTIONAL): STUDENT PRE-SURVEY

Optionally introduce students to the online pre-survey. This is optional before starting the module content. It is also a good idea to make sure you test your intended device(s) to make sure the survey works.

The pre-survey for students can be accessed from the website link below, by clicking on the “HPE Module – Student Survey” button for the relevant year level.

www.caper.com.au

To help us evaluate the effectiveness of the program we need to collect some confidential information from students.

Students’ answers are confidential.

All students will be asked if they would like to complete the optional pre-survey; it may take up to 15 minutes to complete by some students.

Some students may need some support from the teacher to complete the pre-survey.

Please note – If a student does not have permission to participate in the surveys, or chooses not to voluntarily participate, then the student may be given another task to complete in the classroom.

Instructions for survey administration:

It is important that we obtain good and honest information from participants. To this end we request that the pre-survey be completed by students in quiet conditions. We would like all participants to have the opportunity to think through their responses and answer as honestly as they can without any interruption from others.

Could you please read the following to students:

This pre-survey will ask you questions about how you think and feel. It is important that you answer the questions as honestly as possible as the information you provide will be used to help the researchers understand the wellbeing of young people.

Everyone should have the opportunity to answer the questions in a confidential manner, so please do not discuss the questions and your answers with anyone else. Please respect the privacy of other students.

- Do not talk to anyone else as you are filling in the pre-survey.
- Once you have completed your pre-survey a University researcher will look at the answers and analyse the data.
- No one at this school will see your pre-survey answers.
- We thank you for your participation in this important research.

PART 2: INTRODUCE STUDENTS TO THE IDEA OF THE PROGRAM AND THE PEEPS

Introduce students to the idea of the Big Talks program, and show them the Peep characters.

“Over the next 10 weeks we will be learning about feelings and emotions together, and talking about tricky subjects like friendships, belonging and bullying.

Together we’ll watch an animation every week to help us have these conversations and build our understanding and skills around wellbeing.

You’ll get to know all about the Peeps!”

LESSON 1 - PRE-SURVEY & INTRODUCTION

PART 3: GROUP WORK - ALLOCATE STUDENTS TO GROUPS OF 4-5 STUDENTS (NOT WITH FRIENDS)

Have students work in their groups to determine rules for their group. Have students use the guidelines below to realise the features of an effective team/group.

GROUP WORK RULES E.G.

No put downs.

Everyone gets a chance to speak.

Everyone has a role in the group.

Have students select roles within the groups; who will scribe answers to group questions, who will speak for the group, who will coordinate group work, who will be in charge of coordinating resources etc. With younger students, teachers may lead a discussion on group work rules.

Groups discuss how they will work together to ensure success.

How will you:

Ensure everyone contributes fairly?

Respond when someone lets the team down because they haven't done what they said they would do?

Support one another with tasks that seem easy to some but confusing to others?

Resolve differences of opinion or in the way things could be done?

Assign particular tasks to specific individuals (e.g. someone to scribe)?

GROUP RULES!

Record rules - report back to class.

Ensure that students understand important elements of group work. They include:

- Group effort of all members.
- Clear goals.
- Mutual trust and support.
- Open communication.

Once students are in groups (and if there is time) have them begin their first group exercise by discussing the animation in Part 4.

PART 4: ANIMATION AND GROUP WORK TASK

Introduce the animation, "Introduction Animation", explaining that similar animations will be shown in every lesson. Use the animation to generate discussion about feelings and emotions.

- What are some feelings/emotions they are aware of?
- What feelings/emotions are they aware of others having?
- What sharing, helping and cooperative behaviours among friends and classmates can they identify?
- What feelings are associated with helping and being kind to others?

LESSON 1 - PRE-SURVEY & INTRODUCTION

PART 5: BEAN BAG TOSS

After students have watched the introductory video, organise students in a circle for a game of 'Bean Bag Toss'. Using a beanbag passed around the class, each student takes turns trying to name different feelings, to be listed as a word wall on a whiteboard or interactive smartboard by the teacher.

Prompt: If students struggle to identify and verbalise a feeling, the teacher can offer a scenario to encourage the student to identify the corresponding feeling (i.e. How do you feel when you receive a gift? How do you feel when you trip over or stumble on your feet? etc.)

Prompt: With students, discuss corresponding feelings, and responses to feelings as they are expressed or experienced physically:

i.e. 'Joy' may look like a wide smile or laughter; some students may gesture to their chest as to where they feel the emotions and feelings being discussed; anger might look and feel like hands being held in fists or arms crossed. Acknowledge the diversity of experience among students.

Considerations for cultural diversity and diverse learners:

Depending on the classroom context, teachers are encouraged to consider the varying ways in which culturally diverse students may express feelings through gestures.

Students who have a learning disability and/or disability may need guidance in identifying and naming feelings and have alternative strategies for empathising and recognising feelings of themselves and others.

PART 5: CURRICULUM LINKS

Personal, social and community health:
Interacting with others.

General capabilities: Literacy – Speaking and listening: Interacting Students recognise emotions and demonstrate ways to manage how they express their emotions in different situations. (AC9HP2P03)

Continuum extract: Students describe the emotional responses of themselves and others.

PART 6: DRAWING ACTIVITY

Have students return to their workspaces and create a picture showing faces and expressions depicting a range of feelings and how they appear. Encourage students to add colour to their pictures that correlate to the emotions and feelings they draw.

PART 6: CURRICULUM LINKS

Personal, social and community health:
Interacting with others.

General capabilities: Literacy – Speaking and listening: Interacting Students recognise emotions and demonstrate ways to manage how they express their emotions in different situations. (AC9HP2P03)

Continuum extract: Students describe the emotional responses of themselves and others.

PART 7: FACE GALLERY ACTIVITY

The Powerpoint which is bundled in this lesson will have a gallery of faces. Ask students to look carefully at each image individually. Explain that these faces show a range of wide range of different emotions. As a class group, ask students:

Can you **name** some of the emotions that you can see?

Can you **copy** some of the emotions that you can see?

TEACHER CHECKLIST

☐

Have you completed the relevant activities and shown the digital animation?
